

JOB POSITION

- EXPERT SOFTWARE DEVELOPER -

About the role

At Verso Altima Group we are looking for a self-driven and independent software developer with a great sense of teamwork and collaboration with other teammates. Primary focus in the role will be the development of new features and support for already existing applications, along with the design and implementation of new solutions. Also, a software developer will be an integral part of our development team with well-established guidelines and practices, who will collaborate with other teams to meet the targeted goals in a cooperative atmosphere in areas of Telco, E-commerce, and IoT (*Internet of Things*), among others.

What can you expect?

- An assigned mentor who will guide you through onboarding process and throughout your work and career.
- Individual 1 on 1 meetings with the team lead to continuously work on your career and professional goals.
- Flexible working hours and remote work arrangements.
- Work as a member of the development team in a friendly atmosphere that encourages open dialogue.
- Follow global software development best practices.
- Being part of the integration projects including other cross-functional teams and areas (Internet of Things, networking, e-commerce) along with software development.
- Internal presentations and seminars to expand your knowledge, as well as attending conferences and certificates.
- Many different benefits, such as a yearly general paid medical exam, multi-sport card, teamwork, etc.

What do we expect from you?

- Be an independent member of the development team, able to assemble requirements, conduct analysis and develop a business application along with implementation in various business domains including Telco, E-commerce, and IoT
- Supporting the whole lifecycle of software development, deliverables, or parts of business support systems.

- Providing L2/L3 support for Verso Altima modules and deliverables.
- Collaboration with Management Team, Support Team and other teams in the company
- Following industry trends and ensuring alignment across technology portfolios.
- Be a mentor to other junior members and openness to sharing knowledge.
- Organize or be part of educational trainings or workshops.
- Focused on the accomplishment of results and the company's goals.
- Invest in personal growth.
- Highly motivated and persistent.
- Excellent self-organisation and planning abilities.
- Be a team player and proactively and freely discuss ideas or possible improvements.

Minimum requirements

- Advanced knowledge of Java, Spring Framework, and/or Java EE.
- Good knowledge of relational databases.
- Good knowledge of various software development processes.
- Good knowledge of object-oriented programming, design patterns and general best practices in development.
- Knowledge and experience designing automated (unit and integration) tests using well known Java frameworks.
- Proficient in both Windows and Linux OS.
- Medium level of proficiency in technical English language.
- 3-5 years of working experience, mostly in mentioned technologies.
- Basic knowledge of JavaScript, HTML, and CSS.

Following expertise are nice to have, but not mandatory

- Familiarity with Typescript.
- Familiarity with Angular or similar JS framework.

About us

Verso Altima Group is a business integrator internationally recognized in the software and networking business, IoT and digital transformation. We design, develop, implement, maintain and manage advanced ICT solutions. More than 170 customers in 50 countries have improved their businesses with the help of our professionals.
